DOKU · FLEXIBILL · SME & ENTERPRISE PLAYBOOK

Two motions. One engine.

Three dominant verticals per segment in Indonesia and Malaysia, and the insurance lifecycle mapped end to end, from first premium to reinstatement.

Indonesia + Malaysia · September 2026 edition

SME · CONFIGURE, DON'T INTEGRATE

Indonesia

- Education
- Fitness & community
- Property & kos

Malaysia

- Tuition & taska
- Gyms & sports schools
- Strata via PMS

ENTERPRISE · INTEGRATE AND ORCHESTRATE

Indonesia

- Insurance
- Multifinance & lending
- ISP & utilities

Malaysia

- Insurance & takaful
- Education groups
- Property managers

SEGMENTATION

SME or enterprise? Read eight signals.

Signal	SME	Enterprise
Customers per cycle	Tens to a few thousand	Thousands to millions
System of record	Spreadsheet, WhatsApp, a small app	Core system: policy admin, ERP, loan or subscriber platform
Who buys	Owner, principal, finance admin	Heads of payments, operations, IT and product
The pain	A billing week, every month	Lapses, failed debits and reconciliation eat margin
Build mode	No-code first	API or hybrid orchestration
Engine	Billing Automation, auto-debit opt-in	Both engines; Merchant Hosted Scheduler for batch carriers (ID)
Demo path	Pricing Table → invoice → WhatsApp or email → payment	Registration API → scheduler → webhooks → recovery
Proof metric	Time to first bill; admin hours back	Collection rate, lapse rate, reconciliation days

SME · INDONESIA

Three dominant SME plays in Indonesia.

Education

Bimbel, private schools, PAUD

THE PAIN

SPP chased family by family; sibling discounts live in Excel.

THE PLAY

- ✓ Flat monthly SPP per school year
- ✓ Bulk upload the student roster
- ✓ Sibling coupon on tuition only
- ✓ WhatsApp invoice + Billing Portal

DEMO PATH

Bulk file → invoice → WhatsApp → VA or QRIS

Fitness & community

Gyms, studios, koperasi, clubs

THE PAIN

Memberships lapse quietly; dues collection is a volunteer's job.

THE PLAY

- ✓ Pricing Table tiers, self-serve
- ✓ WhatsApp Subscription QR at the desk
- ✓ Auto-debit opt-in + card rescue
- ✓ Win-back coupon after Expired

DEMO PATH

QR → WhatsApp sign-up → first payment → auto-renew

Property & kos

Kos, rentals, housing-cluster IPL

THE PAIN

Rent, utilities and parking billed per unit, every month.

THE PLAY

- ✓ Plan per unit; Open Amount rent
- ✓ Per Unit for metered utilities
- ✓ Late fee after grace by webhook
- ✓ Billing Portal for tenants

DEMO PATH

Member per tenant → subscription → WhatsApp → pay

SME · MALAYSIA

Three dominant SME plays in Malaysia.

Tuition, kindergartens, taska

Tuition, enrichment, preschools

THE PAIN

Fees chased on WhatsApp; receipts and adjustments by hand.

THE PLAY

- ✓ Flat monthly plan per programme
- ✓ Bulk upload each intake
- ✓ Sibling and holiday-month coupons
- ✓ Email invoice: FPX, cards, e-wallets

DEMO PATH

Pricing Table → subscription → email → payment link

Gyms and sports schools

Gyms, martial arts, dance, swim

THE PAIN

Memberships lapse and cards fail quietly between cycles.

THE PLAY

- ✓ Tiers on a Pricing Table
- ✓ Class packs as one-off plans
- ✓ Card auto-debit with retry dates
- ✓ Update Source of Fund link

DEMO PATH

Pricing Table → first payment → card auto-debit

Strata through PMS platforms

JMB and MC via property software

THE PAIN

Maintenance and sinking fund chased unit by unit.

THE PLAY

- ✓ Per Unit plan on share units
- ✓ Sinking fund as a second plan
- ✓ Interest bill by webhook
- ✓ One integration, many sites

DEMO PATH

PMS → Create Subscription → email invoice → FPX

Malaysia today: email, payment link, card auto-debit. No WhatsApp or portal. Calendar and prorate native from Q4 2026.

SME MOTION

A plan live in hours, not an engineering ticket.

INDONESIA

Pricing Table → Subscription → Invoice → WhatsApp + email → Pay: VA, QRIS, e-wallet → Auto-debit opt-in

MALAYSIA

Pricing Table → Subscription → Invoice → Email + link → Pay: FPX, cards, e-wallets → Card auto-debit

#	Ask	It points to
1	How do you create subscriptions today?	Member Center · Pricing Table · WhatsApp sign-up (ID)
2	How are recurring bills generated?	Collections · plans · cycles · bulk upload
3	How are customers notified?	Email · WhatsApp (ID) · Billing Portal (ID)
4	What happens when customers don't pay?	Reminders · retry dates · update link · Confirm Payment
5	How much of this is still manual?	The size of the prize, in their own words

ENTERPRISE · INDONESIA

Three dominant enterprise plays in Indonesia.

Insurance

Life, health, general; banca + agency

THE PAIN

Silent lapses between batch debits; failure reasons arrive late.

THE PLAY

- ✓ Calendar-date auto-debit + retries
- ✓ Registration API V2 at sign-up
- ✓ Webhooks into the policy system
- ✓ PayChat notice + update link

DEMO PATH

Registration → first premium → retry → win-back

Multifinance & lending

Multifinance, lenders, koperasi

THE PAIN

Installments chased by calls; debits fail without warning.

THE PLAY

- ✓ Plan that ends after N installments
- ✓ Direct debit: Mandiri, CIMB, Allo
- ✓ Broadcast reminders before due
- ✓ Late interest as a one-off bill

DEMO PATH

Loan booked → schedule → reminder → auto-debit

ISP & utilities

Regional ISPs, RT/RW Net, PDAM

THE PAIN

Bills must reach thousands before the due date; amounts vary.

THE PLAY

- ✓ Bulk file or SFTP every cycle
- ✓ Usage amounts via Generate Bill
- ✓ WhatsApp bill with a pay button
- ✓ Webhook suspends and restores

DEMO PATH

Usage file → bills → WhatsApp → payment → restore

ENTERPRISE · MALAYSIA

Three dominant enterprise plays in Malaysia.

Insurance & takaful

Insurers, takaful, digital entrants

THE PAIN

Card-on-file failures and manual renewals erode persistency.

THE PLAY

- ✓ Card auto-debit, DOKU Hosted
- ✓ Renewals on Subscription & Billing
- ✓ Webhooks into the policy system
- ✓ Email notice + update link

DEMO PATH

Policy issued → card registered → auto-debit → rescue

Education groups

Multi-branch tuition, private schools

THE PAIN

Every branch bills differently; HQ sees cash weeks late.

THE PLAY

- ✓ One collection per branch
- ✓ Bulk upload per intake
- ✓ API from the student system
- ✓ HQ view in Billing Summary

DEMO PATH

Student system → subscription → email → payment

Property managing agents

Agents running many developments

THE PAIN

One team, dozens of JMB ledgers, month-end reconciliation.

THE PLAY

- ✓ Per Unit on share units
- ✓ Maintenance + sinking fund plans
- ✓ Subscription per unit by API
- ✓ Interest bill by webhook

DEMO PATH

PMS → subscription per unit → invoice → FPX

Malaysia script: no PayChat, no Billing Portal, no Merchant Hosted Scheduler. Localisation package H1 2027.

INSURANCE DEEP MAP

Be the layer that sees a policy about to lapse, and acts before it does.

DOKU INSURANCE BOOK · MONTHLY AVERAGE, JUNE TO AUGUST 2026

82.8%
unique-ID success rate

528,341
transactions a month

Rp473.8B
payment volume a month

2.61% Indonesia's insurance penetration in 2024, the lowest since 2019

4.7% Malaysia's insurance penetration, against a 7.2% global average

Sources: DOKU insurance book, avg Jun–Aug 2026 · Katadata Databoks (2024) · Deloitte via RinggitPlus

INSURANCE · BUSINESS PROCESS

The insurance lifecycle, mapped end to end.

	New business · registration	Premium · collection	Renewal · presentment	Persistency · recovery
Insurer process	Issue the policy; capture first premium and source of funds	Debit on schedule by product and channel; reconcile	Notify before due, present the bill, accept payment	Detect failure, retry, rescue, win back, reinstate
FlexiBill does	**Registration API V2 or Pricing Table; Member Center forms**	**Account Billing calendar dates; card, debit, VA, QRIS**	**Renewal Reminder H-3; WhatsApp, portal, agent link, email**	**Retry dates, Update Source of Fund, coupon, webhooks**
Customer sees	One enrolment, one payment, a confirmation	Nothing at all while payment succeeds	A clear bill in the channel they already read	A plain notice with a one-tap fix
Indonesia · Malaysia	ID adds WhatsApp sign-up · MY: email + link	ID adds direct debit, SFTP batch · MY: cards	ID: PayChat + portal · MY: email + link	ID: PayChat notice · MY: email, insurer's WhatsApp

INSURANCE · SIX LIFECYCLE STATES

Silent on success, deliberate on failure.

1
Active
Premium paid on schedule; nobody has to act

Calendar-date auto-debit

→

2
Premium due
Auto-debit attempted on the billing date

Renewal Reminder H-3

→

3
Grace & retry
A cycle failed; notice and retries begin

Retry dates + notice at H+1

→

4
Lapsed
Grace exhausted after 2 or more failed cycles

Expired webhook → PAS

→

5
Win-back
WhatsApp offer with a commission funded discount

Member coupon + Broadcast

→

6
Reinstated
Customer pays; policy restored, cycle resets

Renewed webhook

H+1
day notice after the bank's reject reason lands

2+
consecutive failed cycles before recovery alerts fire

90
days maximum grace before a policy is flagged Lapsed

%
win-back discount funded from the channel's own commission

INSURANCE · PRODUCT MOMENTS

Seven product types, three billing primitives.

Product	Billing primitive	FlexiBill recipe	Lapse behaviour
Regular premium	Recurring	Account Billing calendar dates, or a recurring plan	Full recovery ladder
Single premium	One-off	Generate Bill one-time, or a one-off plan	No lapse concept
Riders	Prorated one-off + updated recurring	One-off stub bill, then a new billing line after underwriting	Blocked until underwriting approves
Regular top-up	Parallel recurring	A separate billing line; its own card allowed	Light retry; never lapses the base policy
Single top-up	One-off	Generate Bill, or Accept Order in chat (ID)	None: optional and isolated
Travel, single trip	One-off	Payment link at purchase; Accept Order in chat (ID)	None: no ongoing relationship
Travel annual, general	One-off or installment	A recurring plan that ends after N bills	Coverage bound to payment

Asymmetric changes: an upgrade bills now as a prorated one-off; a downgrade applies from the next cycle.

INSURANCE · OPERATING MODELS

Two operating models for carriers.

Indonesia only

A · On-Demand Token Billing

The policy system owns the clock; DOKU executes.

1. First premium tokenises the card or account
2. Policy system builds the TKN_ batch
3. SFTP upload; optional Trigger API
4. Per-record results + DONE notification
5. Failures routed into recovery

Fits: mature policy admin systems, unit-linked (PAYDI), SFTP-batch carriers.

ID + MY

B · Managed Billing Engine

FlexiBill owns plan, schedule, invoice and recovery.

1. Registration API V2 or Pricing Table enrols
2. Calendar dates per policy, retry dates set
3. Invoice or silent auto-debit each cycle
4. Webhooks keep the policy system in sync
5. Reminders, update link, win-back coupons

Fits: non-link products, single-event collection, carriers without a billing engine.

INSURANCE · CHANNELS

Four channels, one recovery engine.

Bancassurance

ENROL
Bank sells; bank source-of-funds auto-debit on the billing date

PRESENT
ID: PayChat message + portal · MY: WhatsApp text + link

ALERT
Bank partner gets scheduled SFTP or email fee lists

RECONCILE
Monthly SFTP archive; win-back from its commission

Agency

ENROL
Agent shares a link or QR; customer self-enrols, zero re-keying

PRESENT
Same ladder: H+1 notice, escalation after 2 cycles

ALERT
The agent is alerted; persistency bonus at stake

RECONCILE
Agency commission statement by SFTP or email

Self-enrolment

ENROL
Pricing Table or Registration API V2 on the insurer's site

PRESENT
Email, plus WhatsApp in ID, with a fresh link

ALERT
The customer owns it: a one-tap fix

RECONCILE
Webhooks straight into the policy system

General & partners

ENROL
Travel and general policies sold at checkout or in chat

PRESENT
One-off payment link; installments as recurring plans

ALERT
Coverage bound to payment, no lapse ladder

RECONCILE
Billing Summary per product

INSURANCE · FOUR VANTAGE POINTS

One policy, four chairs at the table.

Insurer

WANTS

One view of collection health across channels

FLEXIBILL GIVES

Member Center for every policyholder; win-back becomes systemic, not case by case

Bank partner

WANTS

No chasing and no new cost

FLEXIBILL GIVES

Scheduled SFTP or email fee lists; win-back discount pre-set from its own commission

Policyholder

WANTS

To know before coverage is at risk

FLEXIBILL GIVES

A plain notice at H+1 with a one-tap fix; balance shown before it is drawn; portal any time (ID)

Aggregator

WANTS

One console for the whole network

FLEXIBILL GIVES

Roadmap, Q3 2027: native settlement and deposit management across every branch

INSURANCE · WHY FLEXIBILL

Why an insurer picks FlexiBill.

A plan live in hours	not an engineering ticket
No-code and full API	not one or the other
Retry plus a one-tap fix	not a monthly failure report
Discounts the insurer owns	not a bank promo-engine decision
Modular or integrated	not a vendor services project

THE FLEXIBILL MANDATE

Replace static batch charging with subscription-native billing logic: subscription lifecycle + auto-debit + dunning + PayChat = complete insurance billing.

The road to preferred.

STAGE 1 · DECEMBER 2026

Complete

Nine P0 items close collection and recovery: smart retry and reminder, PayChat payment, bulk upload, calendar prorate.

→

STAGE 2 · H1 2027

Carrier-grade

Merchant-hosted PCI capture, installments, Agent Online Services, postpaid, usage billing, Malaysia localisation.

→

CRITICAL → PREFERRED

The instrument never dies

Card-to-token migration, fallback funding, card-network tokens, usage-meter billing, e-materai, B2B billing.

INSURANCE SOLUTION MILESTONES

Q1 2027
Sell-ready: Billing Health Check, Insurance Edition

Q2 2027
Full product-moment self-service in the portal (ID); MY parity begins

Q3 2027
Partner and aggregator billing ships natively

Q4 2027
AI agentic dunning and decision intelligence

INSURANCE BEYOND INDONESIA

The Malaysian and regional insurance script.

MARKET SIGNALS

- Penetration 4.7% against a 7.2% global average
- Digital insurer and takaful licence applications open until December 2026
- Investment-linked demand rebounding while new business slows
- Takaful industry aims for 40% penetration by 2028

LEAD WITH, TODAY

- ✓ Subscription & Billing with MYR decimals
- ✓ Card auto-debit: retry dates, Send One Bill/Month, Freeze the Card
- ✓ Bulk upload, host-to-host API, webhooks
- ✓ Email invoice + payment link: FPX, cards, e-wallets

KEEP OUT · COMING

- ⚠ No PayChat or WhatsApp delivery claims
- ⚠ No Billing Portal, no direct-debit e-mandates
- ⚠ No Merchant Hosted Scheduler or SFTP
- Calendar and prorate: Q4 2026
- Malaysia localisation: H1 2027

Sources: Deloitte via RinggitPlus (2023) · RAM Ratings (2025) · Malaysian Takaful Association via The Edge (2024)

ENTERPRISE MOTION

Health check, pilot, then scale.

DAYS 0–30

Diagnose

- ✓ Billing Health Check: channels, products, failure reasons
- ✓ Quantify cohort size, collection rate, lapse %
- ✓ Pick one cohort and one channel

→

DAYS 31–60

Pilot

- ✓ Registration API V2 or Pricing Table for new business
- ✓ Account Billing retry dates; webhooks into the PAS
- ✓ PayChat notices (ID) or email + link (MY)

→

DAYS 61–90

Scale

- ✓ Add channels and product moments
- ✓ SFTP batch for the back book (ID)
- ✓ Monthly review against pilot KPIs

MEASURE Collection rate · Lapse rate · Admin hours back · Time to first bill · Reconciliation days

NEXT STEP

Protect every renewal. Automate every cycle.
